Vantage Point
Psychological Evaluations

Example Cost Breakdown

Assessment of Autism. Your goals decide your track. Both tracks consider coexisting conditions such as anxiety, depression, trauma-related concerns, and sleep problems.

This is an example, not a quote.

Your actual costs depend on your goals, your history, and the assessments we choose together. I confirm the exact amounts for Payments 2 and 3 at the end of your Initial Clinical Psycho-Diagnostic Evaluation, and I can provide a written quote on request.

- **Billing units** follow CPT time rules. Time that does not reach a full unit is billed as additional services ($75 per 15 minutes). Additional services have no CPT code and are generally not reimbursed by insurance.
- **Insurance:** I do not bill insurance directly. After your assessment, you receive an itemized superbill that you can submit to your insurance company to request reimbursement. Reimbursement is not guaranteed. See the Insurance Reimbursement Inquiry Guide for questions to ask your insurer.
- **If you stop at any point,** you pay only for the services completed, and any unused prepaid amount is refunded.
